

Nov. 22

Dear Clarke: Awfully sorry I didn't see you to-day. but am glad you have my stuff and cues. I shall be interested to see what you do with it all. It is in safe hands.

My book is just out. I have seen but one copy - the one I have. You will get one soon for sure. I have played you up a bit. I do hope my friends will like it - especially the "Grand Old Man". <sup>meanwhile ask</sup> Lieber for a copy.

I have been using your name but not in vain, I hope today. Dr. Ed. Adams is taking hold seriously

of his duties as Chair of the Edison  
Medal Com. and I was in conference  
with him this pm. I told him  
flat that there is a general  
feeling that this year at least the  
central station industry should  
be recognized - especially the  
Edison foundational base of it.  
I mentioned three notable men -  
and there are others - Lieb, Edgar,  
Inoull. Besides the Medal  
is one year in arrears - no  
award in 1915, and there are  
funds in bank. I mentioned  
your zealous activity in the  
Com. and took the liberty of saying  
I believed I voiced your sentiment.  
Dr. A. brings it all up at meeting on  
Friday. I am off to the farm in the  
morning. Ever yours  
E. J. Tamm
